

**SEGUNDA SECCION**  
**PODER EJECUTIVO**  
**SECRETARIA DE MEDIO AMBIENTE**  
**Y RECURSOS NATURALES**

**ACUERDO por el que se da a conocer el resumen del Programa de Manejo de la Reserva de la Biosfera Isla Guadalupe.**

Al margen un sello con el Escudo Nacional, que dice: Estados Unidos Mexicanos.- Secretaría de Medio Ambiente y Recursos Naturales.

JUAN RAFAEL ELVIRA QUESADA, Secretario de Medio Ambiente y Recursos Naturales, con fundamento en lo dispuesto por los artículos 32 bis fracción VII de la Ley Orgánica de la Administración Pública Federal; 66, último párrafo, de la Ley General del Equilibrio Ecológico y la Protección al Ambiente; 76 de su Reglamento en Materia de Areas Naturales Protegidas y 5o., fracción XXV, del Reglamento Interior de la Secretaría de Medio Ambiente y Recursos Naturales, y

**CONSIDERANDO**

Que la Comisión Nacional de Areas Naturales Protegidas, en términos de lo dispuesto por el artículo 66 de la Ley General del Equilibrio Ecológico y la Protección al Ambiente, ha concluido la elaboración del Programa de Manejo del Area Natural Protegida con el carácter de Reserva de la Biosfera, la zona marina y terrestre que incluye a la Isla Guadalupe, de jurisdicción federal, así como a las demás superficies emergidas que se encuentran dentro de la misma, localizada en el Océano Pacífico, frente a la costa de la Península de Baja California, creada mediante Decreto Presidencial publicado en el Diario Oficial de la Federación el 25 de abril de 2005.

Que el artículo 66, último párrafo de la Ley General del Equilibrio Ecológico y la Protección al Ambiente ordena que la Secretaría de Medio Ambiente y Recursos Naturales publique en el Diario Oficial de la Federación un resumen del programa de manejo respectivo y el plano de localización del Area Natural Protegida correspondiente, por lo que he tenido a bien expedir el siguiente:

**ACUERDO POR EL QUE SE DA A CONOCER EL RESUMEN DEL PROGRAMA DE MANEJO  
DE LA RESERVA DE LA BIOSFERA ISLA GUADALUPE**

**ARTICULO UNICO.-** Se da a conocer el Programa de Manejo del área natural protegida con la categoría de Reserva de la Biosfera, la zona marina y terrestre que incluye a la Isla Guadalupe, de jurisdicción federal, así como a las demás superficies emergidas que se encuentran dentro de la misma, localizada en el Océano Pacífico, frente a la costa de la Península de Baja California, cuyo Resumen, que incluye el plano de localización de dicha área natural protegida, se anexa al presente para que surta los efectos legales a que haya lugar.

Dicho Programa de Manejo se encuentra a disposición para su consulta en las oficinas de la Comisión Nacional de Areas Naturales Protegidas, ubicadas en Camino al Ajusco número 200, 3er. piso, colonia Jardines en la Montaña, Delegación Tlalpan, código postal 14210, en la Ciudad de México, Distrito Federal, en las oficinas de la Dirección Regional Península de Baja California y Pacífico Norte, ubicadas en calle Altamirano número 650, esquina Torre Iglesia y República, colonia Esterito, código postal 23020, La Paz, Baja California Sur, y en las oficinas de la Delegación Federal de la propia Secretaría en el Estado de Baja California, ubicadas en Pioneros número 1195, Centro Cívico, código postal 21000, Mexicali, Baja California.

**TRANSITORIO**

**UNICO.-** El presente Acuerdo y su anexo entrarán en vigor al día siguiente de su publicación en el Diario Oficial de la Federación.

Dado en la Ciudad de México, Distrito Federal, a los tres días del mes de junio de dos mil once.- El Secretario de Medio Ambiente y Recursos Naturales, **Juan Rafael Elvira Quesada**.- Rúbrica.

## ANEXO

**RESUMEN DEL PROGRAMA DE MANEJO DE LA  
RESERVA DE LA BIOSFERA ISLA GUADALUPE****INTRODUCCION**

La zona marina y terrestre que incluye a la Isla Guadalupe, así como a las demás superficies emergidas que se encuentran dentro de la misma, localizada en el Océano Pacífico, frente a la costa de la Península de Baja California, fue declarada Reserva de la Biosfera mediante Decreto Presidencial publicado en el Diario Oficial de la Federación el día 25 de abril de 2005, esta zona constituye uno de los sitios de mayor importancia biológica en México. Su riqueza biológica y su belleza paisajística, son razones de peso para su conservación. Gracias a su particular aislamiento y el bajo impacto de las actividades antropogénicas actuales, Isla Guadalupe ofrece una oportunidad inigualable en el estudio de los procesos de regeneración, sucesión y colonización.

**OBJETIVOS GENERAL Y ESPECIFICOS DEL PROGRAMA DE MANEJO****Objetivo General**

Constituir el instrumento rector de planeación y regulación que establece las actividades, acciones y lineamientos básicos para el manejo y la administración donde se promueva la participación en la Reserva de la Biosfera Isla Guadalupe.

**Objetivos específicos**

**Protección:** Lograr la conservación del ecosistema y sus elementos en la Reserva de la Biosfera Isla Guadalupe, mediante la implementación de medidas y políticas para mejorar el ambiente y controlar su deterioro.

**Manejo:** Promover un manejo sustentable de los recursos naturales en las actividades de uso y aprovechamiento que se llevan a cabo actualmente en la Reserva, evaluar la factibilidad de nuevas actividades e impulsar la creación de proyectos amigables con el ambiente, basados en esquemas de aprovechamiento y manejo sustentables de los recursos naturales en la Reserva de la Biosfera Isla Guadalupe orientados a lograr la conservación de los ecosistemas y sus elementos.

**Restauración:** Identificar las áreas dentro de la Reserva de la Biosfera Isla Guadalupe que han sido impactadas por actividades antropogénicas, sobrepastoreo de ganado caprino e introducción de especies exóticas invasoras para realizar actividades de recuperación y restablecimiento de las condiciones que propicien la evolución y continuidad de los procesos naturales, mediante acciones concretas de control de erosión, pérdida de suelo y control de especies exóticas invasoras o que se tornen perjudiciales para el ambiente.

**Conocimiento:** Promover, fomentar, apoyar e incrementar la generación de conocimiento a través de investigaciones, estudios y monitoreos de los factores bióticos, abióticos, económicos y sociales que contribuyan para el manejo de la Reserva de la Biosfera Isla Guadalupe y garanticen la preservación de sus ecosistemas.

**Cultura:** Promover y difundir el valor de los recursos naturales y culturales del área, así como la comprensión de la necesidad de conservar la biodiversidad y aprovecharla en forma sustentable; motivar a los usuarios de la Reserva de la Biosfera Isla Guadalupe a participar en los programas de conservación a través de la educación ambiental y la capacitación.

**Gestión:** Mejorar la instrumentación, supervisión, continuidad y desempeño de los programas y proyectos de la Reserva de la Biosfera Isla Guadalupe, así como la coordinación con los sectores sociales mediante un sistema administrativo práctico, funcional y eficaz.

**DELIMITACION, EXTENSION Y UBICACION DE LAS SUBZONAS****Zonificación y Subzonificación**

De conformidad con lo previsto por la fracción XXXVII del artículo 3, de la Ley General del Equilibrio Ecológico y la Protección al Ambiente, la zonificación es el instrumento técnico de planeación que puede ser utilizado en el establecimiento del área natural protegida, que permite ordenar su territorio en función del grado de conservación y representatividad de sus ecosistemas, la vocación natural del terreno, de su uso actual y potencial, de conformidad con los objetivos dispuestos en la declaratoria correspondiente. La subzonificación consiste en el instrumento técnico y dinámico de planeación, que se establecerá en el programa de manejo respectivo, y que es utilizado en el manejo de las áreas naturales protegidas, con el fin de ordenar detalladamente las zonas núcleo y de amortiguamiento, previamente establecidas en el Decreto por el que se crea el área natural protegida.

De acuerdo con el Decreto Presidencial por el cual se declara área natural protegida, con la categoría de Reserva de la Biosfera, la zona marina y terrestre que incluye a la Isla Guadalupe, de jurisdicción federal, así como a las demás superficies emergidas que se encuentran dentro de la misma, con una superficie total de 476,971-20-15.79 hectáreas, cuenta con una zona núcleo y su respectiva zona de amortiguamiento, que representan un 5.03% y un 94.97%, respectivamente, de la superficie total.

La zona núcleo está constituida por Isla Guadalupe y sus islotes: islote Toro o islote de Enmedio, islote Zapato o islote de Afuera, Morro Prieto o islote Negro y demás superficies emergidas que la rodean, así como la zona federal marítimo terrestre, exceptuando aquella que se encuentra frente a los campamentos Sur y Oeste de la Isla y los cuatro polígonos que se ubican en la Isla que corresponden a la zona de amortiguamiento. Resultando una superficie total de la zona núcleo de 23,991-32-41.12 hectáreas. Tiene como principal objetivo la preservación de los ecosistemas a mediano y largo plazo, en donde se podrán autorizar las actividades de preservación de los ecosistemas y sus elementos, de investigación y colecta científica, educación ambiental, y limitarse o prohibirse aprovechamientos que alteren los ecosistemas.

La zona de amortiguamiento corresponde a la porción marina de la Reserva y cuatro polígonos que se ubican en la Isla, Campo Sur, Campo Oeste (de estos dos polígonos incluye la zona federal marítimo terrestre), Campo Bosque y Campo Pista. Presenta una superficie total de 452,979-87-74.67 hectáreas. Esta zona de amortiguamiento, tiene como función principal orientar a que las actividades de aprovechamiento, que ahí se lleven a cabo, se conduzcan hacia el desarrollo sustentable, creando al mismo tiempo las condiciones necesarias para lograr la conservación de los ecosistemas de ésta a largo plazo.

#### **Criterios de subzonificación**

La subzonificación, también prevista en el Decreto de creación de la Reserva, se realizó después de hacer una descripción y diagnóstico del área, basándose en un análisis de manejo con base en criterios ecológicos, dentro de los principales se encuentran la biodiversidad, presencia de endemismos, la distribución y abundancias de flora y fauna; la distribución y abundancia estacional y espacial de especies incluidas en la Norma Oficial Mexicana NOM-059-SEMARNAT-2001, Protección ambiental-Especies nativas de México de flora y fauna silvestres-Categorías en riesgo y especificaciones para su inclusión, exclusión o cambio-Lista de especies en riesgo, sitios conocidos de alimentación, reproducción o crianza, sitios de restauración, presencia de aves, entre otros.

Para los criterios de uso y socioeconómicos, se tomaron en cuenta los sitios específicos de uso de actividades primarias, los sitios de uso actual y a futuro para el turismo de bajo impacto ambiental, distribución de campamentos temporales y sitios prioritarios para la conservación. Para los criterios operativos se tomó en cuenta las operaciones e instalaciones de la SEMAR, de la SCT y estructuras actuales y planteadas a futuro para el manejo y conservación de la Reserva.

#### **Metodología**

Como se mencionó, la subzonificación se realizó haciendo una descripción y diagnóstico del área, basándose en un análisis de manejo con base en criterios ecológicos, de uso, socioeconómicos y operativos basados en el Decreto de creación de la Reserva y el artículo 47 BIS de la Ley General del Equilibrio Ecológico y la Protección al Ambiente. Además, se tomó en cuenta las aportaciones de diversos investigadores, usuarios del campamento temporal de pescadores, organizaciones de la sociedad civil e institutos de investigación que han trabajado en la Reserva, que se reunieron en talleres y reuniones celebrados durante 2008 y 2009, en la ciudad de Ensenada, Baja California.

La metodología de la zonificación consistió de tres etapas:

Caracterización, donde se integró la información disponible del área de estudio y se identificó las características de cada área, considerando las necesidades y los intereses. En esta etapa se consiguió una ortofoto del INEGI (1980) y una imagen quickbird para auxiliar en la subzonificación.

La segunda etapa fue el diagnóstico, donde se identificaron, analizaron y definieron las actividades, usos actuales y potenciales tomando en cuenta los indicadores ecológicos y socioeconómicos.

La última etapa consistió en la propuesta donde se generó una propuesta de subzonificación, para consulta.

#### **Subzonas y políticas de manejo**

Esta subzonificación pretende orientar las actividades y usos permitidos, conforme a la legislación aplicable en la materia, en concordancia con los objetivos de protección de la Reserva, por lo que cada subzona estará sujeta a regímenes diferenciados de manejo y señalará las actividades permitidas y no permitidas en cada una de ellas.

Por lo anterior y de acuerdo al Decreto de creación de la Reserva de la Biosfera Isla Guadalupe, se establecen las siguientes subzonas:

**Zona núcleo:**

- Subzona de Protección Islotes
- Subzona de Uso Restringido Isla
- Subzona de Uso Restringido Aguaje
- Subzona de Uso Restringido Caminos
- Subzona de Uso Restringido Campamentos Pesqueros

**Zona de amortiguamiento:**

- Subzona de Aprovechamiento Sustentable de los Recursos Naturales Campo Bosque
- Subzona de Aprovechamiento Sustentable de los Recursos Naturales Campo Oeste-Campo Tepeyac
- Subzona de Aprovechamiento Sustentable de los Recursos Naturales Albatros de Laysan
- Subzona de Aprovechamiento Sustentable de los Recursos Naturales Aguas Circundantes de la Isla Guadalupe
- Subzona de Uso Público Campo Pista
- Subzona de Uso Público Tiburón Blanco

**Zona núcleo**

Conformada por la Isla Guadalupe, así como por las superficies emergidas conocidas como: Islote Toro o Islote de Enmedio, Islote Zapato o Islote de Afuera, Morro Prieto o Islote Negro y demás superficies emergidas que la rodean, así como toda la zona federal marítimo terrestre, exceptuando aquella que se encuentre frente a los campamentos Sur y Oeste de la misma Isla y a los cuatro polígonos que se ubican en la Reserva. Resultando una superficie total de 23,991-32-41.12 hectáreas. En esta zona, se encuentran sitios importantes de descanso y reproducción de tres especies de mamíferos marinos (lobo fino de Guadalupe *Arctocephalus townsendi* con categoría en peligro de extinción; lobo marino de California *Zalophus californianus*, sujeta a protección especial y el elefante marino del norte *Mirounga angustirostris* con categoría de amenazada) presentes en la Reserva y listadas en la Norma Oficial Mexicana NOM-059-SEMARNAT-2001, Protección ambiental-Especies nativas de México de flora y fauna silvestres-Categorías en riesgo y especificaciones para su inclusión, exclusión o cambio-Lista de especies en riesgo. Así mismo constituye el hábitat de innumerables especies de plantas, algunas endémicas, como la palma (*Brahea edulis*) y el ciprés de Guadalupe (*Cupressus guadalupensis*); así como una gran cantidad de invertebrados marinos y terrestres. Además se encuentran importantes centros de anidación de aves marinas, como el Albatros de Laysan (*Phoebastria immutabilis*) y es sitio de descanso para otras especies de aves marinas y migratorias, se le considera como Área de Importancia para la Conservación de las Aves.

En cuanto a los Islotes y los acantilados que rodean la Isla son importantes pues representan una fuente importante de especies nativas y endémicas. Los Islotes representan los últimos ambientes prístinos de la Reserva. Estos se encuentran libres de especies exóticas invasoras y poseen poblaciones saludables de plantas endémicas. Por esta razón, la protección de los Islotes debe ser tomada seriamente, ya que éstos podrían funcionar en un futuro como fuente de semillas para la repoblación de especies vegetales de la Isla principal. Los Islotes también constituyen lugar de anidación de numerosas aves marinas.

**Subzona de Protección Islotes**

La superficie que corresponde a la zona núcleo constituida por las superficies emergidas conocidas como: Islote Toro o Islote de Enmedio, Islote Zapato o Islote de Afuera, así como a toda la zona federal marítimo terrestre que les corresponde. Tiene una superficie total de 72.397094 hectáreas conformada por tres polígonos. Ambos Islotes representan las zonas de biodiversidad que no han sido impactadas por actividades humanas o especies exóticas invasoras. El Islote Toro es una pequeña superficie que se encuentra en el extremo sur de Isla Guadalupe y del Islote el Zapato. Hasta el año 2000 se documentó la flora encontrando 32 especies y un híbrido putativo interespecífico (Rebman *et al.*, 2002). 18 de los taxa de plantas son endémicos del archipiélago de Isla Guadalupe, lo que representa 56.3% de endemismo en la flora del Islote. En el Islote Zapato, se encuentran las especies *Mammillaria blossfeldiana* var. *shurliana*, incluidas en la Norma Oficial Mexicana NOM-059-SEMARNAT-2001, Protección ambiental-Especies nativas de México de flora y fauna silvestres-Categorías de riesgo y especificaciones para su inclusión, exclusión o cambio-Lista de especies en riesgo, es una especie ginodioica con dos condiciones sexuales. Algunos individuos muestran evidencias de dimorfismo floral, condición reportada como única en esta especie.

Las actividades permitidas y no permitidas en los polígonos que constituyen esta subzona, se indican en el siguiente cuadro:

| <b>Subzona de Protección Islotes</b>                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

### Subzona de Uso Restringido Isla

Esta subzona corresponde a casi la totalidad de la Isla Guadalupe incluye la zona federal marítimo terrestre. Tiene una superficie total de 23826.490537 hectáreas y la conforman 11 polígonos. En esta subzona se encuentran sitios de descanso y reproducción de tres especies de pinnípedos (lobo fino de Guadalupe *Arctocephalus townsendi*; lobo marino de California *Zalophus californianus* y el elefante marino del norte *Mirounga angustirostris*) se encuentran diversos sitios de anidación de aves, como el Albatros de Laysan (*Phoebastria immutabilis*) y se encuentran especies endémicas de gran importancia como el ciprés de Guadalupe (*Cupressus guadalupensis*) y la palma de Guadalupe (*Brahea edulis*). Se encuentran dentro de esta subzona 32 especies listadas en la Norma Oficial Mexicana NOM-059-SEMARNAT-2001, Protección ambiental-Especies nativas de México de flora y fauna silvestres-Categorías en riesgo y especificaciones para su inclusión, exclusión o cambio-Lista de especies en riesgo. En esta subzona se encuentran una gran cantidad de especies endémicas que requieren de un tratamiento especial para asegurar su distribución a largo plazo.

Las actividades permitidas y no permitidas en los polígonos que constituyen esta subzona se indican en el siguiente cuadro:

| Subzona de Uso Restringido Isla                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

<sup>1</sup> Conforme a lo previsto por el artículo 2o., fracción VI del Reglamento de la Ley General de Vida Silvestre.

<sup>2</sup> Conforme a lo previsto por el artículo 2o., fracción VII del Reglamento de la Ley General de Desarrollo Forestal Sustentable.

**Subzona de Uso Restringido Aguaje**

Corresponde al sitio donde se encuentra el único manantial permanente en la Isla ubicado al noroeste de la Isla, se hace explotación de dicho recurso por parte de la Sociedad Cooperativa de Pescadores, por el Grupo de Conservación de Islas y algunas veces por parte de la Secretaría de Marina y por el personal de la CONANP. Presenta una superficie de 0.479635 hectáreas, la conforma un polígono. Siendo el único manantial de agua, es indispensable para la presencia del ser humano en la Isla, así como para la subsistencia de la flora y fauna de la Reserva de la Biosfera Isla Guadalupe. Así mismo, representa un sitio de descanso para aves migratorias y residentes de la Isla.

Las actividades permitidas y no permitidas en el polígono que constituye esta subzona se indican en el siguiente cuadro:

| <b>Subzona de Uso Restringido Aguaje</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

<sup>1</sup> Conforme a lo previsto por el artículo 2o., fracción VI del Reglamento de la Ley General de Vida Silvestre.

<sup>2</sup> Conforme a lo previsto por el artículo 2o., fracción VII del Reglamento de la Ley General de Desarrollo Forestal Sustentable.

<sup>3</sup> Dichas actividades se podrán permitir previa autorización y siempre y cuando no impliquen modificaciones de las características o condiciones naturales originales del área, el acceso deberá limitarse durante el periodo reproductivo de aves migratorias.

### Subzona de Uso Restringido Caminos

Corresponde a las vías de comunicación terrestre, construidas previo al decreto, se caracterizan por ser caminos de terracería que comunican a los polígonos Campo Sur, Campo Bosque, Campo Oeste y Campo Pista. Tiene una superficie de 90.722586 hectáreas y la conforman cuatro polígonos. Recorren casi el largo de la Isla, por lo que es posible encontrar diversas especies que se encuentran en la Norma Oficial Mexicana NOM-059-SEMARNAT-2001, Protección ambiental-Especies nativas de México de flora y fauna silvestres-Categorías en riesgo y especificaciones para su inclusión, exclusión o cambio-Lista de especies en riesgo.

Las actividades permitidas y no permitidas en los polígonos que constituyen esta subzona se indican en el siguiente cuadro:

| Subzona de Uso Restringido Caminos                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

<sup>1</sup> Conforme a lo previsto por el artículo 2o., fracción VI del Reglamento de la Ley General de Vida Silvestre.

<sup>2</sup> Conforme a lo previsto por el artículo 2o., fracción VII del Reglamento de la Ley General de Desarrollo Forestal Sustentable.

<sup>3</sup> Dichas actividades se podrán permitir previa autorización y siempre y cuando no impliquen modificaciones de las características o condiciones naturales originales del área, el acceso deberá limitarse durante el periodo reproductivo de aves migratorias.

**Subzona de Uso Restringido Campamentos Pesqueros**

Cuenta con cuatro polígonos, con una superficie total de 1.234260 hectáreas. El primero localizado al noreste de la Isla, conocido como Campo Norte, Rada Norte, Rada Noreste o La Prisión donde se localiza un campamento temporal de pescadores, construido previo al decreto, este polígono incluye la zona federal marítima terrestre. Cuenta con una superficie de 1.131778 hectáreas. Existe un faro y dos construcciones, una antigua base naval construida por la Secretaría de Marina y un cuartel construido en siglos pasados. Se encuentra una colonia de elefantes marinos (*Mirounga angustirostris*) y lobo fino de Guadalupe (*Arctocephalus townsendi*). Tanto por los atractivos naturales del sitio, como son las especies de pinnípedos y los atractivos culturales, se considera un sitio propicio para las actividades de turismo de bajo impacto ambiental. Además de las actividades realizadas en el campamento pesquero se realizan obras de restauración en coordinación con el Instituto Nacional de Antropología e Historia.

El segundo polígono, conocido como Campo Lima, corresponde a un campamento temporal de pescadores instalado previo al decreto, localizado del lado este con una superficie de 0.004025 hectáreas.

El tercer polígono corresponde a un polígono localizado al sureste de la Isla, conocido como Los Corrales, es un campamento pesquero instalado previo al decreto. Cuenta con una superficie de 0.014345 hectáreas. Además presenta viejas estructuras con paredes de piedra, que presuntamente fueron construidas por Aleutianos que venían a cazar elefante marino el siglo pasado a Isla Guadalupe. Algunas de estas piedras presentan inscripciones en las rocas que datan del año 1824.

El cuarto de ellos, corresponde a un polígono localizado al sureste de la Isla, conocido como Arroyitos, es un campamento temporal de pescadores construido previo al decreto, dentro de este polígono se encuentra la zona federal marítimo terrestre. Tiene una superficie de 0.084112 hectáreas. En donde se encuentra una colonia pequeña de elefantes marinos (*Mirounga angustirostris*) y lobo fino de Guadalupe (*Arctocephalus townsendi*), el cual se usa como sitio de descanso.

Las actividades permitidas y no permitidas en los polígonos que constituyen esta subzona se indican en el siguiente cuadro:

Realizar actividades cinegéticas, de explotación, captura y aprovechamiento de especies de flora y fauna silvestre.<br>17. Realizar actividades comerciales.<br>18. Tirar o abandonar desperdicios.<br>19. Turismo.<br>20. Tránsito de vehículos automotores, excepto para contingencias ambientales, además de labores de operación y administración de la Reserva.<br>21. Verter o descargar desechos o cualquier otro tipo de material nocivo en el suelo, subsuelo y en cualquier clase de cauce, vaso o acuífero, así como desarrollar cualquier actividad contaminante. |

<sup>1</sup> Conforme a lo previsto por el artículo 2o., fracción VI del Reglamento de la Ley General de Vida Silvestre.

<sup>2</sup> Conforme a lo previsto por el artículo 2o., fracción VII del Reglamento de la Ley General de Desarrollo Forestal Sustentable.

#### Zona de Amortiguamiento

Conformada por la porción marina de la Reserva de la Biosfera, así como cuatro polígonos terrestres ubicados al interior de la Isla denominados: Campo Bosque, Campo Pista, Campo Oeste y Campo Sur. La superficie total de la zona de amortiguamiento es de 452,979-87-74.67 hectáreas.

#### Subzona de Aprovechamiento Sustentable de los Recursos Naturales Campo Bosque

Abarca la totalidad del polígono de la zona de amortiguamiento denominado Campo Bosque localizado al noroeste de la Isla Guadalupe, con una superficie de 9.537709 hectáreas, en esta subzona se presentó en el mes de septiembre del 2008 un incendio en el bosque de Ciprés (*Cupressus guadalupensis*) y dado que se trata de una especie endémica con categoría de riesgo de acuerdo a la Norma Oficial Mexicana NOM-059-SEMARNAT-2001, Protección ambiental-Especies nativas de México de flora y fauna silvestres-Categorías en riesgo y especificaciones para su inclusión, exclusión o cambio-Lista de especies en riesgo y en la lista roja internacional de la IUCN, las labores de restauración a corto y largo plazo requieren de medidas estrictas de control.

Las actividades permitidas y no permitidas en esta subzona se indican en el siguiente cuadro:

| Subzona de Aprovechamiento Sustentable de los Recursos Naturales Campo Bosque                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

<sup>1</sup> Conforme a lo previsto por el artículo 2o., fracción VI del Reglamento de la Ley General de Vida Silvestre.

<sup>2</sup> Conforme a lo previsto por el artículo 2o., fracción VII del Reglamento de la Ley General de Desarrollo Forestal Sustentable.

#### **Subzona de Aprovechamiento Sustentable de los Recursos Naturales Campo Oeste-Campo Tepeyac**

Esta subzona está constituida por dos polígonos con una superficie de 57.937288 hectáreas; el primero abarca la totalidad de la zona de amortiguamiento de Campo Oeste y una tercera parte de la zona de amortiguamiento Campo Sur, el primer polígono Campo Oeste se encuentra al suroeste de la Isla Guadalupe, con una superficie de 53.947453 hectáreas considerando la zona federal marítimo terrestre. En esta área se encuentra un campamento temporal de pescadores de la Sociedad Cooperativa de Pescadores.

El segundo polígono abarca una tercera parte de Campo Sur, comprende una superficie de 3.989835 hectáreas considerando la zona federal marítimo terrestre y se ubica al sur de la Isla Guadalupe. Dentro de este polígono se encuentran las instalaciones de operación y vigilancia de la Secretaría de Marina, así como un faro de la Secretaría de Comunicaciones y Transportes.

Las actividades permitidas y no permitidas en los polígonos que constituyen esta subzona se indican en el siguiente cuadro:

| <b>Subzona de Aprovechamiento Sustentable de los Recursos Naturales Campo Oeste-Campo Tepeyac</b>                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

#### **Subzona de Aprovechamiento Sustentable de los Recursos Naturales Albatros de Laysan**

Constituida por un polígono que abarca dos terceras partes de la zona de amortiguamiento denominada Campo Sur, comprende un polígono con una superficie de 7.216519 hectáreas se ubica al sur de la Isla Guadalupe. Es un sitio de anidación de Albatros de Laysan (*Phoebastria immutabilis*), especie que se encuentra en la Norma Oficial Mexicana NOM-059-SEMARNAT-2001, Protección ambiental-Especies nativas de México de flora y fauna silvestres-Categorías de riesgo y especificaciones para su inclusión, exclusión o cambio-Lista de especies en riesgo, en la categoría de amenazado. Según la lista roja de la IUCN se encuentra en la categoría de vulnerable y los estudios muestran que su población se está reduciendo. En esta subzona se encuentra una construcción que se utiliza para la investigación de la mencionada especie.

Las actividades permitidas y no permitidas en esta subzona se indican en el siguiente cuadro:

#### **Subzona de Aprovechamiento Sustentable de los Recursos Naturales Aguas Circundantes de la Isla Guadalupe (ACIG)**

Constituida por un polígono que abarca la mayor parte de la superficie marina de la zona de amortiguamiento de la Reserva de la Biosfera, comprende un polígono con una superficie de 452,109.742506 hectáreas, esta subzona marina cuenta con una batimetría compleja, debido al origen volcánico de la Isla. Existe una gran diversidad de especies marinas, como son la tortuga caguama (*Caretta caretta*), la tortuga carey (*Eretmochelys imbricata*) y la golfina (*Lepidochelys olivacea*), además de 18 especies de mamíferos marinos, como: el zífido de Cuvier (*Ziphius cavirostris*) sujeta a protección especial; la ballena azul (*Balaenoptera musculus*) sujeta a protección especial; el lobo fino de Guadalupe (*Arctocephalus townsendi*) en peligro de extinción; la tonina, tursión o delfín nariz de botella (*Tursiops truncatus*) sujeta a protección especial, entre otros, que se encuentran en la Norma Oficial Mexicana NOM-059-SEMARNAT-2001, Protección ambiental-Especies nativas de México de flora y fauna silvestres-Categorías de riesgo y especificaciones para su inclusión, exclusión o cambio-Lista de especies en riesgo, en la categoría de amenazado. En esta subzona se da el aprovechamiento de la langosta roja del Pacífico (*Panulirus interruptus*), tres especies de abulón (*Haliotis californiensis*, *Haliotis corrugada* y *Haliotis fulgens*) y recientemente el pepino de mar (*Parastichopus parvimensis*).

Las actividades permitidas y no permitidas en esta subzona se indican en el siguiente cuadro:

| <b>Subzona de Aprovechamiento Sustentable de los Recursos Naturales Aguas Circundantes de la Isla Guadalupe (ACIG)</b>                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

<sup>1</sup>Conforme a lo previsto por el artículo 2o., fracción VI del Reglamento de la Ley General de Vida Silvestre.

#### **Subzona de Uso Público Campo Pista**

Constituida por un polígono que comprende en su totalidad la zona de amortiguamiento denominada Campo Pista, abarca una superficie de 187.948327 hectáreas, en ella se localiza la pista de terracería de aterrizaje de los vehículos aéreos ubicada al centro de la Isla Guadalupe, utilizada por aeronaves que transportan personal, equipo, alimentos y productos pesqueros de la Secretaría de Marina, la CONANP, la Sociedad Cooperativa de Pescadores; así como investigadores y personal de otras dependencias de gobierno y organizaciones de la sociedad civil que realizan diferentes actividades en el área.

Las actividades permitidas y no permitidas en esta subzona se indican en el siguiente cuadro:

| <b>Subzona de Uso Público Campo Pista</b>                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                  |

<sup>2</sup> Conforme a lo previsto por el artículo 2o., fracción VII del Reglamento de la Ley General de Desarrollo Forestal Sustentable.

#### Subzona de Uso Público Tiburón Blanco

Constituida por un polígono marino ubicado al noreste de la Isla, abarca una superficie de 607.495118 hectáreas, cuenta con sitios disponibles de fondeo o anclaje y es considerada una de las áreas de mayor observación del Tiburón Blanco (*Carcharodon carcharias*) en las aguas de Isla Guadalupe. El área es conocida como Rada Norte, Rada Noreste o La Prisión. Las aguas que rodean a Isla Guadalupe son un sitio para el Tiburón Blanco, especie que se encuentran en la Norma Oficial Mexicana NOM-059-SEMARNAT-2001, Protección ambiental-Especies nativas de México de flora y fauna silvestres-Categorías de riesgo y especificaciones para su inclusión, exclusión o cambio-Lista de especies en riesgo, en la categoría de amenazada y en la lista roja de la IUCN como especie vulnerable, es el sitio ideal de distribución del Tiburón Blanco (*Carcharodon carcharias*) por la presencia de tres especies de pinnípedos además de una variedad de especies de cetáceos y peces que son parte de la dieta de este depredador.

Las actividades permitidas y no permitidas en esta subzona se indican en el siguiente cuadro:

| <b>Subzona de Uso Público Tiburón Blanco</b>                                                               |                                                                                                                                    |

| 5. Observación de Tiburón Blanco, bajo los términos establecidos en el apartado de Reglas Administrativas. | 5. Instalar plataformas o infraestructura de cualquier índole que afecte los ecosistemas marinos                                   |
| 6. Pesca comercial.                                                                                        | 6. Introducir ejemplares o poblaciones exóticas.                                                                                   |
| 7. Turismo y turismo de bajo impacto ambiental.                                                            | 7. Pesca en embarcaciones de mediana altura y de altura.                                                                           |
| 8. Tránsito de embarcaciones                                                                               | 8. Pesca, salvo aquella con fines comerciales.                                                                                     |
|                                                                                                            | 9. Tirar o abandonar desperdicios.                                                                                                 |

<sup>1</sup>Conforme a lo previsto por el artículo 2o., fracción VI del Reglamento de la Ley General de Vida Silvestre.

### **Zona de influencia**

La zona de influencia de un área protegida es la superficie aledaña a su poligonal, la cual mantiene una estrecha interacción social, económica y ecológica con ésta.

La Reserva, recibe una gran influencia por la *Corriente de California* (CC), dicha corriente fluye desde la Columbia Británica en Canadá, hasta el sur de la Península de Baja California, donde vira hacia el oeste, es considerada una corriente somera (0-100 m.) con acarreo de agua de altas latitudes hacia el ecuador durante la mayor parte del año y que se caracteriza por temperaturas y salinidades bajas (Lynn y Simpson, 1987).

Isla Guadalupe se localiza en la región sur de dicha corriente, debido a su orientación norte-sur y su forma alargada actúa como una barrera contra el flujo de la corriente, lo que produce una serie de remolinos a diferentes profundidades. En las aguas circundantes de la Reserva, se presentan procesos de retención y concentración de nutrientes y oleaje alto, dicha corriente permite que la flora y fauna sea muy similar a la del norte de la Península de Baja California, ya que se mantienen las mismas condiciones físico-químicas.

La ciudad de Ensenada, Baja California es la zona con mayor interacción social y económica con respecto a la Reserva de la Biosfera Isla Guadalupe. Todas las personas que viajan, desembarcan y aterrizan en la Reserva, salen de la mencionada Ciudad, por ser el punto de comunicación directa, tanto para la realización de visitas turísticas, de investigación o bien, dependencias de gobierno que realizan actividades de inspección, vigilancia y supervisión. La Sociedad Cooperativa de Producción Pesquera de Participación Estatal Abuloneros y Langosteros, tiene su residencia en dicha Ciudad, y desarrollan sus actividades de extracción de langosta, abulón y pepino de mar en las aguas de la Reserva.

Mapa de localización y subzonificación de la Reserva de la Biosfera Isla Guadalupe.

**COORDENADAS DE LOS VERTICES DE LA SUBZONIFICACION DE LA  
RESERVA DE LA BIOSFERA ISLA GUADALUPE**

Coordenadas en el sistema geográfico con Datum de referencia ITRF92 y un Elipsoide GRS80. Para la construcción de los polígonos se deben de integrar los vértices de todas las categorías, debido a que se presentan uno o varios polígonos dentro de un polígono mayor de diferente categoría.

## REGLAS ADMINISTRATIVAS

### Capítulo I. Disposiciones generales

**Regla 1.** Las presentes Reglas Administrativas son de observancia general y obligatoria para todas aquellas personas físicas o morales que realicen obras o actividades dentro del área natural protegida Reserva de la Biosfera, zona marina y terrestre que incluye a la Isla Guadalupe, de jurisdicción federal, así como a las demás superficies emergidas que se encuentran dentro de la misma, localizada en el Océano Pacífico, frente a las costas de la Península de Baja California.

**Regla 2.** La aplicación de las presentes Reglas corresponde a la Secretaría de Medio Ambiente y Recursos Naturales en coordinación con la Secretaría de Marina, sin perjuicio de las atribuciones que correspondan a otras dependencias del Ejecutivo Federal.

**Regla 3.** Para efectos de las presentes Reglas Administrativas, además de las definiciones contenidas en la Ley General del Equilibrio Ecológico y la Protección al Ambiente, en su Reglamento en Materia de Areas Naturales Protegidas, se entenderá por:

- I. *Buceo semiautónomo tipo hooka*: Actividad de buceo que cuenta con un compresor de aire, el cual suministra aire al buzo por medio de una manguera o línea de aire;
- II. *Campamentos pesqueros*: Instalaciones temporales establecidas antes de la expedición del decreto por el que se establece la Reserva de la Biosfera, utilizadas por los pescadores de forma periódica, para pernoctar, limpiar y conservar los productos pesqueros, acondicionados para tal fin;
- III. *CONANP*: Comisión Nacional de Areas Naturales Protegidas, órgano administrativo desconcentrado de la Secretaría de Medio Ambiente y Recursos Naturales;
- IV. *Dirección*: El personal designado por la Secretaría de Medio Ambiente y Recursos Naturales para dirigir y administrar la Reserva de la Biosfera Isla Guadalupe, encargado de coordinar la planeación, ejecución y evaluación del presente Programa de Manejo;
- V. *Ecotecnia*: Las técnicas para la producción de vivienda, alimentos y energía, así como para crear nuevas formas de industrialización de los recursos renovables que garantizan una operación limpia, económica y ecológica que puede conseguirse mediante acciones participativas, comunitarias y a través de la armonización de objetivos económicos, sociales y ecológicos;
- VI. *Embarcación mayor*: Todo aquel de quinientas unidades de arqueo bruto o mayor, que reúna las condiciones necesarias para navegar;
- VII. *Embarcación menor*: Todo aquel de menos de quinientas unidades de arqueo bruto, o menos de quince metros de eslora, cuando no sea aplicable la medida por arqueo;
- VIII. *Guía*: Las personas físicas que proporcionan al turista nacional o extranjero orientación e información profesional sobre el patrimonio turístico, cultural y de atractivos relacionados con el turismo de bajo impacto ambiental de la Reserva de la Biosfera Isla Guadalupe, así como servicios de asistencia;

- IX. *LGEEPA*: Ley General del Equilibrio Ecológico y la Protección al Ambiente;
- X. *LGVS*: Ley General de Vida Silvestre;
- XI. *LGDFS*: Ley General de Desarrollo Forestal Sustentable;
- XII. *Observación del Tiburón Blanco*: Actividad turística de bajo impacto ambiental que consiste en la observación del Tiburón Blanco (*Carcharodon carcharias*) en jaulas, mediante la prestación de servicios, que se realiza en la Reserva de la Biosfera Isla Guadalupe;
- XIII. *Pesca deportivo-recreativa*: La que se práctica con fines de esparcimiento o recreación con las artes de pesca autorizadas por la Ley General de Pesca y Acuicultura Sustentable, reglamentos y normas oficiales vigentes.
- XIV. *Pesca de consumo doméstico*: Es la captura y extracción que se efectúa sin propósitos de lucro y con el único objeto de obtener alimento para quien la realice y sus dependientes, por tanto no podrá ser objeto de comercialización;
- XV. *PROFEPA*: Procuraduría Federal de Protección al Ambiente, órgano administrativo desconcentrado de la Secretaría de Medio Ambiente y Recursos Naturales;
- XVI. *Reglas*: A las presentes Reglas Administrativas;
- XVII. *Reserva*: A la Reserva de la Biosfera Isla Guadalupe;
- XVIII. *SAGARPA*: Secretaría de Agricultura, Ganadería, Desarrollo Rural, Pesca y Alimentación;
- XIX. *SCT*: Secretaría de Comunicaciones y Transportes;
- XX. *SEMARNAT*: Secretaría de Medio Ambiente y Recursos Naturales;
- XXI. *SEMAR*: Secretaría de Marina;
- XXII. *Sendero interpretativo*. Es un pequeño camino o huella que permite recorrer con facilidad un área determinada de la Reserva de la Biosfera Isla Guadalupe, que cumple varias funciones, como: servir de acceso y paseo para los visitantes, ser un medio para el desarrollo de actividades educativas y servir para los propósitos administrativos de la referida área protegida, en su caso;
- XXIII. *Sitio de anclaje o fondeo*: Sitio en el cual una embarcación se sujeta al fondo marino utilizando para tal fin un ancla;
- XXIV. *Turismo de bajo impacto ambiental*: Aquella modalidad turística ambientalmente responsable consistente en viajar o visitar espacios naturales de la Reserva de la Biosfera, relativamente sin perturbar, con el fin de disfrutar, apreciar y estudiar los atractivos naturales de dichos espacios; así como cualquier manifestación cultural del presente y del pasado que puedan encontrarse ahí, a través de un proceso que promueve la conservación, tiene bajo impacto ambiental y cultural.
- XXV. *Usuario*: Todas aquellas personas que ingresan a la Reserva con la finalidad de realizar actividades recreativas, comerciales, investigación, servicios generales, navegación, vigilancia y apoyo, y
- XXVI. *Visitante*: Persona que se desplaza temporalmente fuera de su lugar de residencia para uso y disfrute de la Reserva de la Biosfera Isla Guadalupe, utilizando los servicios de prestadores de servicios turísticos o realizando sus actividades de manera independiente.

**Regla 4.** El uso, explotación y aprovechamiento de los recursos naturales que se pretendan realizar dentro de la Reserva, se sujetarán al Decreto de creación de la Reserva, al presente Programa de Manejo y demás disposiciones jurídicas aplicables. Por lo que quienes pretendan realizar obras o actividades dentro de la misma, deberán contar, en su caso y previamente a su ejecución, con la autorización de impacto ambiental correspondiente.

**Regla 5.** Los usuarios están obligados en todo momento a proporcionar el apoyo y facilidades necesarias al personal de la SEMARNAT, SAGARPA, SEMAR y demás autoridades competentes, para que éstos puedan realizar las labores de inspección, vigilancia y protección del área, así como atender cualquier situación de emergencia, contingencia o limpieza.

**Regla 6.** El turismo y la recreación se llevarán a cabo bajo los criterios que se establezcan en las presentes Reglas y la subzonificación de la Reserva, siempre que:

- I. No se provoque una alteración significativa a los ecosistemas;
- II. Preferentemente tengan un beneficio directo para los pobladores locales;
- III. Promueva la educación ambiental, y
- IV. La infraestructura requerida sea acorde con el entorno natural de la Reserva.

**Regla 7.** Las personas que realicen actividades de exploración, rescate y mantenimiento de zonas arqueológicas, previamente coordinadas con el INAH, las llevarán a cabo sin alterar o causar impactos ambientales significativos sobre los recursos naturales.

**Regla 8.** Los visitantes, prestadores de servicios turísticos y en general todo usuario de la Reserva deberán cumplir con las presentes Reglas, y tendrán las siguientes obligaciones:

- I. Cubrir, en su caso, las cuotas establecidas en la Ley Federal de Derechos y portar en forma visible la forma valorada que acredite el pago correspondiente;
- II. Hacer uso exclusivamente de las rutas, caminos y senderos establecidos por la Dirección de la Reserva;
- III. Respetar la señalización, la zonificación y subzonificación de la Reserva;
- IV. Atender las observaciones y recomendaciones formuladas por el personal de la SEMARNAT, SAGARPA y SEMAR relativas a asegurar la protección y conservación de los ecosistemas de la Reserva;
- V. Hacer del conocimiento del personal de la Reserva, PROFEPA y/o de la SEMAR, las irregularidades que hubieren observado durante su estancia en la Reserva.
- VI. Tramitar los permisos necesarios para la realización de las actividades en la Reserva, ante las autoridades fiscales, portuarias y migratorias que en su caso ameriten.
- VII. Brindar el apoyo y las facilidades necesarias para que el personal de la CONANP, la SEMAR y la PROFEPA realice labores de inspección, vigilancia, protección y control, así como a cualquier otra autoridad competente en situaciones de emergencia o contingencia.

**Regla 9.** La infraestructura o construcciones que pretendan realizarse en la Reserva deberán realizarse, en la medida de lo posible, con ecotecnias guardando armonía con el entorno natural de la Isla Guadalupe.

**Regla 10.** La Dirección podrá solicitar a los visitantes o prestadores de servicios turísticos la información que a continuación se describe, con la finalidad de hacer las recomendaciones necesarias en materia de residuos sólidos, prevención de incendios forestales y protección de los elementos naturales existentes en el área, así como para obtener información que se utilice en materia de protección civil, protección al turista y migración:

- a) Descripción de las actividades a realizar;
- b) Tiempo de estancia;
- c) Lugares a visitar, y
- d) Origen del visitante.

## **Capítulo II. De las autorizaciones, concesiones y avisos**

**Regla 11.** Se requerirá de la autorización de la SEMARNAT, por conducto de la CONANP, para realizar dentro de la Reserva, las siguientes actividades:

- I. Actividades turístico recreativas dentro de áreas naturales protegidas, en todas sus modalidades, y
- II. Filmaciones, actividades de fotografía, captura de imágenes o sonidos con fines comerciales en áreas naturales protegidas.

**Regla 12.** La vigencia de las autorizaciones previstas en la regla anterior será:

- a) Hasta por dos años, para realizar actividades turístico recreativas.
- b) Por el periodo que dure el trabajo para filmaciones o actividades de fotografía, captura de imágenes o sonidos, con fines comerciales.

**Regla 13.** La autorización emitida por la SEMARNAT, por conducto de la CONANP para la realización de actividades turístico recreativas, podrá ser prorrogada por el mismo periodo por el que fueron otorgadas, siempre y cuando el particular presente una solicitud, con treinta días naturales de anticipación a la terminación de la vigencia de la autorización correspondiente (en los meses de abril a septiembre) debiendo anexar a éste el informe final de sus actividades realizadas, en el idioma español, a la Dirección de la Reserva.

**Regla 14.** Con la finalidad de proteger los recursos naturales de la Reserva y brindar el apoyo necesario por parte de la Dirección, los responsables de proyectos o trabajos deberán presentar previamente un aviso acompañado con el proyecto correspondiente, dirigido al Director de la Reserva, para la realización de las siguientes actividades:

- I. Educación ambiental que no implique ninguna actividad extractiva;
- II. Investigación sin colecta o manipulación de especímenes de especies no consideradas en riesgo;
- III. Monitoreo sin colecta o manipulación de especímenes de especies no consideradas en riesgo, y
- IV. Filmaciones, actividades de fotografía, la captura de imágenes o sonidos por cualquier medio, con fines científicos, culturales o educativos, que requieran de equipos compuestos por más de un técnico especializado como apoyo a la persona que opera el equipo principal.

Previo a la realización actividades de investigación con colecta o manipulación de ejemplares de flora y fauna silvestre, el interesado deberá, además de contar con la autorización correspondiente, presentar un aviso ante la Dirección de la Reserva.

**Regla 15.** Se requerirá de autorización emitida por SEMARNAT, a través de sus distintas unidades administrativas para la realización de las siguientes actividades:

- I. Colecta de ejemplares, partes y derivados de vida silvestre con fines de investigación científica y propósitos de enseñanza, en todas sus modalidades;
- II. Manejo, control y remediación de problemas asociados a ejemplares o poblaciones que se tornen perjudiciales;
- III. Obras y actividades que requieren de presentación de una manifestación de impacto ambiental, en todas sus modalidades;
- IV. Colecta de recursos biológicos forestales, en las modalidades:
  - a. Con fines científicos, y
  - b. Científica con apoyo o respaldo de instituciones científicas o académicas interesadas en el proyecto.

**Regla 16.** Se requerirá de concesión o asignación del Titular del Ejecutivo Federal, a través de la CONAGUA para la realización de las siguientes actividades:

- I. Uso, explotación o aprovechamiento de aguas nacionales superficiales
- II. Uso, explotación o aprovechamiento de aguas nacionales subterráneas, conforme a lo previsto en los artículos 18, primer párrafo y 42, fracción I de la Ley de Aguas Nacionales

**Regla 17.** Se requerirá de concesión o permiso por parte de la SEMARNAT para el uso, aprovechamiento o realización de obras e instalaciones en la superficie de la Zona Federal Marítimo Terrestre.

**Regla 18.** Los extranjeros que deseen obtener permisos, autorización, avisos, prórrogas están obligados a comprobar su legal estancia en el país, con el fin de acreditar su condición y calidad migratoria, de conformidad con las disposiciones jurídicas aplicables.

**Regla 19.** Por su seguridad, los titulares de los permisos deberán hacer del conocimiento, según sea el caso, a la SEMAR, a través de la Segunda Región Naval Militar, o a la Fuerza Aérea Mexicana, así como a la Capitanía de Puerto de Ensenada, de las fechas de arribo y salida de la Reserva.

### **Capítulo III. De las embarcaciones**

**Regla 20.** Todas las embarcaciones que ingresen a la Reserva deberán cumplir con las disposiciones de la Secretaría de Comunicaciones y Transportes, conforme a lo indicado en el Certificado Nacional de Seguridad Marítima correspondiente. Tratándose de embarcaciones extranjeras éstas deberán cumplir con las disposiciones legales aplicables en la materia.

**Regla 21.** Los usuarios y en general todas las personas que ingresen a la Reserva deberán respetar la señalización, boyas o balizas, debiendo hacer del conocimiento a la Dirección de la Reserva cualquier daño a las mismas.

**Regla 22.** En caso de daño al sistema de boyeo y/o señalización, el responsable del mismo deberá realizar la reparación o reposición correspondiente.

**Reglas 23.** En caso de emergencia, la reparación de motores u otros equipos que puedan tener como consecuencia derrame de combustibles o aceites, deberá evitarse el vertimiento de los mismos a fin no dañar a los ecosistemas de la Reserva.

**Regla 24.** Las embarcaciones deberán contar con trampas para grasas u otros mecanismos similares que eviten que las aguas de las sentinas se mezclen con los combustibles, grasas y aceites.

**Regla 25.** Las embarcaciones que posean servicio de sanitarios, deberán contar con contenedores para aguas residuales. Es responsabilidad de los prestadores de servicios descargar las aguas residuales y desperdicios orgánicos de comida fuera de la Reserva, en los sitios que para tal efecto destinen las autoridades competentes.

**Regla 26.** La velocidad de las embarcaciones en la zona de amortiguamiento marina será de hasta 20 nudos, a una distancia de 5 kilómetros en línea recta de la Isla, las embarcaciones deberán reducirla a un máximo de 10 nudos. En la aproximación al lugar en donde deben atracar o fondear, deberán de reducirla a 4 nudos.

**Regla 27.** Las embarcaciones mayores deberán anclarse o fondearse a una distancia no menor a 100 metros de la costa de Isla Guadalupe, en línea recta, a fin de no perturbar a la fauna de la Isla.

**Regla 28.** Durante la noche, las embarcaciones deberán de reducir la iluminación exterior de la embarcación al mínimo, a fin de no afectar a las aves marinas nocturnas.

**Regla 29.** Todas las embarcaciones que entren a la Reserva deberán contar con medios eficientes de radiocomunicación de conformidad con las disposiciones legales aplicables.

**Regla 30.** Solamente podrán atracar las embarcaciones menores en los sitios determinados por la Dirección de la Reserva para este fin.

#### **Capítulo IV. De los prestadores de servicios turísticos recreativos**

**Regla 31.** Los prestadores de servicios turísticos que pretendan desarrollar actividades turísticas, incluyendo la observación de tiburón blanco dentro de la Reserva, deberán contar previamente con la autorización que para tal efecto emita la CONANP, y deberán cerciorarse que su personal y los visitantes que contraten sus servicios, cumplan con lo establecido en las presentes Reglas y, en la realización de sus actividades serán sujetos de responsabilidad en los términos que establezcan las disposiciones jurídicas que resulten aplicables.

La Dirección no se hará responsable por los daños que sufran los visitantes o usuarios en sus bienes, equipos o integridad física, ni de aquellos causados a terceros, durante la realización de sus actividades dentro de la Reserva.

**Regla 32.** Los prestadores de servicios turísticos deberán contar con un seguro vigente de responsabilidad civil y de daños a terceros, con la finalidad de ante cualquier daño o perjuicio que sufran en su persona o en sus bienes los visitantes, así como de los causados a los vehículos y equipo, o aquellos producidos a terceros durante su estancia y desarrollo de actividades en la Reserva.

**Regla 33.** Los prestadores de servicios turísticos recreativos se obligan a informar a los usuarios que están ingresando a un área natural protegida, en la cual se desarrollan acciones para la conservación de la biodiversidad y la preservación del entorno natural; asimismo, deberán hacer de su conocimiento la importancia de su conservación y la normatividad que deberán acatar durante su estancia.

**Regla 34.** Los prestadores de servicios turísticos recreativos y su personal deberán cerciorarse que en sus embarcaciones no exista fauna nativa al momento de abandonar la Reserva.

**Regla 35.** Para la realización de actividades turísticas no deberán de utilizarse botes inflables conocidos como "zodiac".

**Regla 36.** Los prestadores de servicios turísticos recreativos deberán de respetar y hacer del conocimiento de los visitantes las temporadas críticas, vedas, sitios restringidos, la capacidad de carga y distancias mínimas de observación de la fauna silvestre de acuerdo a la subzonificación.

**Regla 37.** Los grupos de visitantes podrán contratar un guía de turistas, preferentemente local, quien será responsable del grupo. Los prestadores de servicio y en su caso, los guías de turistas y deberán cumplir, según correspondan, con lo establecido en las siguientes normas oficiales mexicanas:

- I. La Norma Oficial Mexicana NOM-05-TUR-2003, Que establece los requisitos mínimos de seguridad a que deben sujetarse las operadoras de buceo para garantizar la prestación del servicio;
- II. La Norma Oficial Mexicana NOM-08-TUR-2002, Que establece los elementos a que deben sujetarse los guías generales y especializados en temas o localidades específicas de carácter cultural;
- III. La Norma Oficial Mexicana NOM-09-TUR-2002, Que establece los elementos a que deben sujetarse los guías especializados en actividades específicas, y
- IV. La Norma Oficial Mexicana NOM-011-TUR-2001, Que establece los Requisitos de seguridad, información y operación que deben cumplir los prestadores de servicios turísticos de Turismo de Aventura.

#### **Capítulo V. Buceo deportivo**

**Regla 38.** Para las actividades de buceo deportivo, la distancia mínima de acercamiento entre el buzo y los organismos marinos no podrá ser menor a 5 metros.

**Regla 39.** Las embarcaciones destinadas a los servicios turísticos de buceo, deben contar con los elementos y equipo de seguridad señalados a continuación: un botiquín de primeros auxilios, equipo de oxigenoterapia, agua potable suficiente, boyas y banderas que indiquen la zona de buceo al público.

**Regla 40.** Durante las actividades de buceo deportivo, no se deberán emplear cuchillos, navajas, lámparas, "bang sticks", ballestas, arpones, pistolas con arpón, o cualquier otro dispositivo, arma u artefacto que pueda causar un daño a la fauna de la Reserva.

#### **Capítulo VI. Pesca deportivo-recreativa**

**Regla 41.** Las actividades de pesca deportivo-recreativa y buceo no podrán realizarse de manera simultánea, en virtud de los riesgos que implican sobre los turistas, tiburones y fauna de acompañamiento.

**Regla 42.** No se permite la pesca con arpón durante los meses de agosto a enero en la Reserva. Fuera de esta temporada, la pesca con arpón se limitará a sólo 5 ejemplares por día, utilizando únicamente arpones de banda de goma o resorte y sólo mediante buceo a pulmón.

**Regla 43.** Durante la realización de actividades de pesca deportivo-recreativa, se deberá observar la Norma Oficial Mexicana NOM-017-PESC-1994, Para regular las actividades de pesca deportiva recreativa en las aguas de jurisdicción federal de los Estados Unidos Mexicanos y demás disposiciones legales aplicables.

**Regla 44.** Queda estrictamente prohibida la pesca de tiburón blanco y aquellas especies contenidas en la NOM-029-PESC-2006, Pesca responsable de tiburones y rayas. Especificaciones para su aprovechamiento.

**Regla 45.** La capacidad de carga para las actividades de pesca deportivo-recreativa en la subzona denominada de Aprovechamiento Sustentable de los Recursos Naturales Marina será de un máximo de diez embarcaciones mayores y de cinco embarcaciones menores al mismo tiempo, debiendo respetar una separación de al menos 450 metros. Para realizar dichas actividades se deberá consultar el calendario de visitas, previo a su visita, con la Dirección de la Reserva.

**Regla 46.** La actividad de pesca deportivo-recreativa no deberá interferir con el comportamiento de los tiburones, rayas, aves marinas, mamíferos marinos y tortugas marinas.

#### **Capítulo VII. Observación de Tiburón Blanco.**

**Regla 47.** Las actividades de observación de Tiburón Blanco únicamente se podrán realizar en la subzona denominada de Uso Público Tiburón Blanco.

**Regla 48.** La capacidad de carga para las actividades de observación del Tiburón Blanco, en la subzona denominada de Uso Público Tiburón Blanco es de un máximo de diez embarcaciones mayores y cinco embarcaciones menores al mismo tiempo, debiendo respetar una distancia no menor a 325 metros entre los sitios de anclaje o fondeos. Para realizar dichas actividades se deberá consultar el calendario de visitas, previo a su visita, con la Dirección de la Reserva.

**Regla 49.** Las embarcaciones que realicen actividades de observación de Tiburón Blanco sólo podrán realizar un máximo de tres maniobras de anclaje al día en la subzona denominada de Uso Público Tiburón Blanco.

**Regla 50.** Para la observación de Tiburón Blanco no deberán de utilizarse botes inflables conocidos como “zodiac” para el acercamiento a los tiburones o mamíferos marinos.

**Regla 51.** Los prestadores de servicios deberán informar a los turistas los procedimientos de operación y seguridad para la observación del Tiburón Blanco, tanto a bordo de la embarcación como dentro de las jaulas antes de iniciar la actividad.

**Regla 52.** La actividad de observación del Tiburón Blanco no deberá interferir con el comportamiento de las aves marinas, mamíferos marinos y tortugas marinas.

**Regla 53.** No se permitirá el uso de dispositivos que molesten o lastimen a los tiburones o a la fauna de la Reserva, sea químico, acústico o eléctrico, el uso de éstos se encuentra restringido a los operadores autorizados, quienes sólo podrán utilizarlos en casos de emergencia.

**Regla 54.** Para las actividades turísticas de observación de Tiburón Blanco, no se permitirá el uso de flash para la toma de fotografías.

**Regla 55.** La observación del Tiburón Blanco se realizará exclusivamente en las jaulas de superficie que son aquellas que se encuentran a nivel de superficie y hasta a 5 metros debajo del nivel del mar.

**Regla 56.** El número máximo de ocupantes por inmersión por jaula será de hasta cuatro turistas para las jaulas de superficie.

**Regla 57.** Los prestadores de servicios deberán colocar un sistema de flotación de emergencia apropiado en la jaula de superficie, de tal forma que los buzos estén protegidos de cualquier daño posible.

**Regla 58.** Cuando la embarcación se encuentre realizando actividades de buceo en jaula, no podrá realizar de manera simultánea actividades de pesca deportivo-recreativa debido a los riesgos que el desarrollo simultáneo de ambas actividades tiene sobre los turistas, los tiburones y la fauna de acompañamiento.

**Regla 59.** Los materiales para la elaboración de las jaulas y la estructura de las mismas no deberán afectar, lastimar o dañar a los tiburones, por lo que las uniones o soldaduras de los barrotes deberán ser desbastadas a fin de evitar bordes cortantes y deberán protegerse las esquinas con materiales que minimicen y amortigüe cualquier golpe o impacto.

**Regla 60.** Las jaulas para la observación de Tiburón Blanco deberán tener un dispositivo de desalojo rápido de emergencia. En el caso de las jaulas de superficie, deberán estar unidas a la embarcación y mantener una distancia mínima de 30 cm y no mayor a 100 cm de la cubierta de la embarcación.

**Regla 61.** Para las jaulas de superficie, sólo se permitirá el buceo semiautónomo tipo hooka, mientras que las líneas o mangueras de alimentación de aire deberán estar fuera del alcance de los tiburones.

**Regla 62.** Se deberá colocar de forma segura dentro de cada jaula y fuera del alcance de los tiburones un cilindro de 800 litros de aire fresco equipado con un regulador octopus, para casos de emergencia.

**Regla 63.** Está estrictamente prohibido ofrecer cualquier tipo de atrayente, carnada o alimento a los tiburones blancos desde el interior de cualquier tipo de jaula de observación; salvo lo previsto en la Regla 67 del presente instrumento.

**Regla 64.** En caso de que se presente un Tiburón cuya insistencia en acercarse a las jaulas sea frecuente o cuyo comportamiento sea potencialmente peligroso tanto para los visitantes como para el propio Tiburón, el operador responsable deberá retirar a los buzos de la jaula y retirar las mismas de inmediato por al menos una hora.

**Regla 65.** Queda prohibido el buceo en jaula nocturno con el fin de garantizar la seguridad en los usuarios y la integridad de la fauna local.

**Regla 66.** El uso de atrayentes para la actividad de observación de Tiburón Blanco, requerirá de la autorización que para tal efecto emita la SEMAR. Los atrayentes deberán estar contenidos en un recipiente biodegradable y deberán ser derivados de productos de pescado utilizado comercialmente de especies que se distribuyan en la zona marina aledaña, tales como sardina, macarela molida o aceite de atún, siempre que cuenten con un certificado de que están libres de agentes patógenos o especies exóticas invasoras.

Bajo ninguna circunstancia el atrayente podrá ser elaborado con carne de mamíferos, aves o peces diferentes a los señalados en esta Regla.

**Capítulo VIII. De los visitantes**

**Regla 67.** La temporada para visitas y realización de actividades turístico-recreativas dentro de la Reserva, será exclusivamente en los periodos que señale la Dirección, quien hará del conocimiento del público en general los periodos correspondientes a través de las Capitanías de Puerto más cercanas al área natural protegida.

**Regla 68.** Los visitantes de la Reserva deberán acatar en todo momento las observaciones y recomendaciones formuladas por el personal de la Dirección, relativas a asegurar la protección y conservación de los ecosistemas del área, así como las relativas al mantenimiento y uso de las instalaciones.

**Capítulo IX. De la investigación científica**

**Regla 69.** Todo investigador que ingrese a la Reserva con el propósito de realizar colecta con fines científicos deberá notificar a la Dirección sobre el inicio de sus actividades, antes de dar comienzo a las mismas, adjuntando copia de la autorización con que se cuente, asimismo, deberá informar al mismo del termino de sus actividades y hacer llegar a la Dirección una copia de los informes exigidos en dicha autorización.

**Regla 70.** Con la finalidad de garantizar la correcta realización de las actividades de colecta e investigación científica, los investigadores deberán sujetarse a los lineamientos y condicionantes establecidos en la autorización respectiva, la Norma Oficial Mexicana NOM-126-SEMARNAT-2000, Que establece las especificaciones para la realización de actividades de colecta científica de material biológico de especies de flora y fauna silvestre y otros recursos biológicos en el territorio nacional y demás disposiciones legales aplicables.

**Regla 71.** En las actividades de colecta científica, en caso de organismos capturados accidentalmente deberán ser liberados al momento en el sitio de la captura.

**Regla 72.** Los investigadores que, como parte de su trabajo, requieran extraer de la Reserva, ejemplares de flora, fauna, fósiles, rocas o minerales o vestigios arqueológicos, deberán contar con la autorización de las autoridades correspondientes, de acuerdo con las disposiciones legales aplicables.

**Regla 73.** Quienes realicen actividades de colecta científica en la Reserva, deberán destinar al menos un duplicado del material biológico colectado a instituciones o colecciones científicas mexicanas en los términos de la LGVS y demás disposiciones legales aplicables.

**Regla 74.** Las autorizaciones de colecta científica no amparan el aprovechamiento para fines comerciales ni de utilización en biotecnología.

**Regla 75.** La colecta de los recursos forestales con fines de investigación en áreas que sean el hábitat de especies de flora o fauna silvestres endémicas, amenazadas o en peligro de extinción, deberá hacerse de manera que no se alteren las condiciones necesarias para la subsistencia, desarrollo y evolución de dichas especies.

**Regla 76.** El marcaje de tipo satelital o acústico, colocación de cámaras en cualquier organismo, sólo se autorizará para fines científicos y de investigación científica y para el monitoreo.

**Regla 77.** Cualquier otro aparato o mecanismo presurizado para la observación de tiburones (campanas de buceo, pequeños submarinos, entre otros) están restringidos para fines científicos y de investigación científica y para el monitoreo.

**Capítulo X. De los usuarios.**

**Regla 78.** Los usuarios deberán de contar con un manejo de sus residuos, tanto orgánicos como inorgánicos. Los residuos orgánicos deberán depositarlos en compostas comunales en los sitios designados por la Dirección de la Reserva. Los residuos inorgánicos deberán de separarse y enviarse de regreso a un centro de acopio en el continente.

**Regla 79.** La colocación de nuevas antenas y demás dispositivos de comunicación estarán sujetos a las disposiciones legales aplicables siempre que no amenacen o perturben a las poblaciones y ecosistemas.

**Regla 80.** Los usuarios deberán de reducir al mínimo la iluminación exterior de las construcciones con el fin de no afectar a las aves nocturnas.

**Regla 81.** La capacidad de carga de vehículos terrestres dentro de la Isla será de 20 unidades máximo de manera simultánea, a fin de minimizar los efectos negativos que por su uso puedan ocasionar a la fauna local.

Asimismo, los dueños o usuarios de vehículos terrestres cuya vida útil haya concluido, deberán sacarlos de la Reserva y enviarlos al continente, a fin de evitar la acumulación de chatarra dentro del área natural protegida.

**Capítulo XI. De los aprovechamientos**

**Regla 82.** Con el objeto de garantizar la conservación de las especies protegidas de la Reserva, en las Subzonas de Aprovechamiento Sustentable de los Recursos Naturales, sólo se permitirá el uso de artes de pesca de alta selectividad de especies, que implican el bajo riesgo de captura incidental de dichas especies y que estarán sujetas a las disposiciones establecidas por la autoridad competente de conformidad con las disposiciones jurídicas aplicables.

**Regla 83.** Los aprovechamientos pesqueros podrán realizarse siempre y cuando no impliquen daños al hábitat, la captura incidental de especies consideradas en riesgo, no se sobrepasen las tasas, límites de cambio aceptable o capacidades de carga establecidos de conformidad con las disposiciones jurídicas aplicables.

**Regla 84.** La reforestación en áreas degradadas de la Reserva se realizará exclusivamente con especies nativas y con material genético de la región.

**Capítulo XII. De la subzonificación.**

**Regla 85.** Con la finalidad de conservar los ecosistemas y la biodiversidad existente en la Reserva, así como delimitar territorialmente la realización de actividades dentro de la misma, se establecen las siguientes subzonas.

**ZONA NUCLEO:**

| SUBZONAS DE:    | NOMBRE                                | SUPERFICIE              |
|-----------------|---------------------------------------|-------------------------|
| PROTECCION      | Islotes (constituida por 3 polígonos) | 72.397094 Hectáreas     |
| USO RESTRINGIDO | Campamentos Pesqueros                 | 1.234260 Hectáreas      |
|                 | Aguaje (constituida por 1 polígono)   | 0.479635 Hectáreas      |
|                 | Caminos (constituida por 4 polígonos) | 90.722586 Hectáreas     |
|                 | Isla (constituida por 11 polígonos)   | 23,826.490537 Hectáreas |

**ZONA DE AMORTIGUAMIENTO:**

| SUBZONAS DE:                                                 | NOMBRE                                                                     | SUPERFICIE               |
|--------------------------------------------------------------|----------------------------------------------------------------------------|--------------------------|
| <b>APROVECHAMIENTO SUSTENTABLE DE LOS RECURSOS NATURALES</b> | Campo Bosque (constituida por 1 un polígono)                               | 9.537709 Hectáreas       |
|                                                              | Campo Oeste-Campo Tepeyac (constituida por 2 polígonos)                    | 57.937288 Hectáreas      |
|                                                              | Albatros de Laysan (constituida por 1 un polígono)                         | 7.216519 Hectáreas       |
|                                                              | Aguas Circundantes de la Isla de Guadalupe (constituida por 1 un polígono) | 452,109.742506 Hectáreas |
| <b>USO PUBLICO</b>                                           | Campo Pista (constituida por 1 un polígono)                                | 187.948327 Hectáreas     |
|                                                              | Tiburón Blanco (1)                                                         | 607.495118 Hectáreas     |

**Regla 86.** El desarrollo de las actividades permitidas y no permitidas dentro de las subzonas antes mencionadas, se estará a lo previsto en el apartado denominado Políticas de manejo y subzonificación del presente programa de manejo.

### **Capítulo XIII. De las prohibiciones**

**Regla 87.** Dentro de la Reserva queda prohibida la realización de las siguientes actividades:

En la zona núcleo:

- I. Cambiar el uso del suelo
- II. Ejecutar nuevas obras públicas o privadas;
- III. Interrumpir, rellenar, desecar o desviar flujos hidráulicos;
- IV. Introducir especies o poblaciones exóticas;
- V. Realizar actividades cinegéticas, de explotación, captura y aprovechamiento de especies de flora y fauna silvestre, y
- VI. Verter o descargar desechos o cualquier otro tipo de material nocivo en el suelo, subsuelo y en cualquier clase de cauce, vaso o acuífero, así como desarrollar cualquier actividad contaminante.

En la zona de amortiguamiento:

- I. Construir confinamientos de materiales y sustancias peligrosas;
- II. Modificar las condiciones naturales de los acuíferos, cuencas hidrológicas, cauces naturales de corrientes, manantiales, riberas y vasos existentes, salvo que sea necesario para el cumplimiento del presente Decreto y el programa de manejo, así como de aquellas actividades que no impliquen algún impacto ambiental significativo y que cuenten con la autorización correspondiente;
- III. Instalar plataformas o infraestructura de cualquier índole que afecte los ecosistemas marinos;
- IV. Interrumpir, rellenar, desecar o desviar flujos hidráulicos, sin la autorización correspondiente;
- V. Usar explosivos, sin la autorización de la autoridad competente;
- VI. Tirar o abandonar desperdicios;
- VII. Realizar, sin autorización, actividades de dragado o de cualquier naturaleza que generen la suspensión de sedimentos o provoquen áreas fangosas o limosas dentro del área protegida o zonas aledañas;
- VIII. Realizar actividades de pesca, sin autorización de la autoridad correspondiente, y
- IX. Realizar aprovechamientos mineros, sin la autorización que en materia ambiental se requiera.

### **Capítulo XIV. De la inspección y vigilancia**

**Regla 88.** La inspección y vigilancia del cumplimiento de las presentes Reglas, corresponde a la SEMARNAT por conducto de la PROFEPA, en coordinación con la SEMAR, sin perjuicio de las atribuciones que correspondan a otras dependencias del Ejecutivo Federal.

**Regla 89.** Toda persona que tenga conocimiento de alguna infracción o ilícito que pudiera ocasionar algún daño a los ecosistemas de la Reserva, deberá notificar a las autoridades competentes de dicha situación, por conducto de la PROFEPA o la Dirección de la Reserva, con el objeto de realizar las gestiones correspondientes.

### **Capítulo XV. De las sanciones y los recursos**

**Regla 90.** Las violaciones al presente instrumento serán sancionadas de conformidad con lo dispuesto en la LGEEPA y sus reglamentos, así como en el Título XXV del Código Penal Federal y demás disposiciones legales aplicables.

**Regla 91.** El prestador de servicios o visitante que viole las disposiciones contenidas en el presente instrumento, salvo en situaciones de emergencia, en ningún caso podrán permanecer en la Reserva y será conminado por el personal de la PROFEPA y de la SEMAR a abandonar el área.

---
